ABOUT COMPANY

Rapple Solar is a trusted provider of reliable, affordable home & commercial energy solutions. With a wide range of solar energy equipment to give you back the power.

Why us?

In South Africa today, one of the most common problems with electricity supply is, specifically, excessive electricity costs and grid instability. The best solution to this problem that we are faced with, is solar power, which is a dependable and sustainable option.

Our goal is to provide you with the knowledge and skills necessary to make independent decisions about solar power, while assisted by our knowledgeable and friendly team.

We want to empower you, the citizens of South Africa and its neighbors, to manage your own energy consumption and lessen your carbon footprint.

OUR SERVICES

- Solar Panels
- Batteries
- Inverters
- Heating & Cooling
- Installation services

Residential Solutions

We recognize how intimidating it can feel. However, it's just one more feather in our cap to assure you that we won't leave you on your own to work things out. You don't have to do the hard job.

We acknowledge the complexity of solar photovoltaic technology, so don't feel terrible if you don't understand these ideas.

Commercial Solutions

The term "commercial solar" describes the use of solar power systems and panels to provide energy for buildings used for business or commerce. Businesses can benefit from a number of incentives and tax breaks as well as cheaper energy bills and a smaller carbon footprint thanks to these solar systems. Larger in size than residential installations, commercial solar projects are made to specifically address the energy requirements of enterprises.
